WORK EXPERIENCE

Internship   Cygnet Infotech(Jan 2019- May 2019)

--I was assign to a Project call Process Asset Library(PAL) in which I've go through all the development phase of process for build the project from scratch, also I made prototype version of this project during my internship, it was great experience with cygnet i was working
with manager and in other team member for the first time.

Junior Reactjs Developer   SocialPilot LLP (June 2019 - Dec 2019)

--My work primarily involved working with React and Redux . I quickly understood the code base and improved it over time to make the development process faster. I also collaborated with Back End Developers and handled the ownership of developing front ends of two major feather updates and shipped them to production. Apart from that I also worked on migrating PHP code to React. Along with enhancing my React and Redux concepts, this work experience has also helped me improve my modern JavaScript (ES6) and version control understandings.

PREVIOUS EDUCATION

Ldrp-itr(KSVUniversity)

Bachelor of Engineering in Computer Science, 2019, 7.19 Cpi

AbhinavVidhyaVihaar

HSC 2015, 60 %

Nutan High School

SSC 2013, 74.0%

MAJOR PROJECTS

- **Local Services Android App**
  Last Semester Project (Android,java,MongoDb,node js)

  This application will give you authority to create local services for vehicle management in your relative location and also helps other to book that service.In This Project I have Implemented Google Map API which was Integration with own latitude longitude values for making marker related things on map.I have also Used Retrofit,Fire-base and other libraries and for back-end I have Used Node with mongoDb .

- **Process Asset Library(PAL)**
  Summer Internship project

  For Managing Asset in an Organization this Web Application was created ,In which for front-end We have Used React-redux and back-end was Managed By flask-rest full Api ,In which It was Connected With PostgreSQL. Here this project was Build with different react popular libraries like react-redux, redux-thunk ,redux-form,React Bootstrap etc.

INTERESTS AND HOBBIES

Aside from making website or android application, I am also interested in Street ,Architectural and portrait Photography. I love to Make or Editing Videos in Adobe premier And Edit Photos in Adobe Lightroom.

OTHER PROJECTS

- **Blogger And News Android App**
  6th Semester Project (Android,java,firebase)

  This application I have implemented Android with FireBase for first time In which i have used firebase for authentication ,Cloud storage and Cloud Notification in android mobile phone. Also here In this project I have Used Blogger Api for getting blog post's from the blogger

- **Real-time Chat room**
  udacity learning course(android ,java,firebase)

  This application gives Us chat room which is basically use firebase Live database storage system,where User have to log In with their Gmail account or Email in Our Application then after they will be able to do chating with others,also I used Cloud messaging from firebase for notification purpose

- **Real time web app with socket io**
  (node js ,mongoose,socket io,express,moment)

  This application gives Us chat room which is basically use socket and node js combination where front end was created with express.js .where you have to enter in particulate room for chatting with other joiner's in that chat room
